 Above Ground
 Below Ground

DETAILED DESCRIPTION OF PROJECT:

I (We) certify (or declare) under penalty of perjury under the laws of the State of Washington that the foregoing is true, correct and complete to the best of my (our) knowledge. I (We) further certify (or declare) that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed to the best of my (our) knowledge and are shown on the site plan submitted with this application. I (We) understand that encroachment and/or building into easements, deed restrictions or other encumbrances are my (our) responsibility and not Chelan County's. I (We) further affirm that my (our) signature below that I (we) have obtained legal permission to build within or encumber all easements on this property. Owner hereby releases, discharges, indemnifies and holds harmless the County from and against any and all claims, demands, causes of action, suits or judgments (including costs and expenses incurred in connection therewith) by both the easement holder or encumbered person(s) arising out of or in connection with the County's issuance of a building permit. (We) certify (or declare) that I (We) am the owner of the property or have been given authorization from the property owner to obtain this permit. I (We) further agree to comply with the International Building, Residential, Fire, Mechanical, Plumbing, and all applicable Chelan County/City Codes. Applicant/Owner(s) assumes all risk and liability for any claims and liabilities.

SITE PLAN FOR PROPANE (LP) TANK

Please draw a map of the home below with the following information:

- Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and under ground, as well as setback from property lines.
- If LP tank is underground, identify the distance from the tank to the structure(s).
- Identify the location of windows, heat pump, air conditioner and vents in relation to the LP tank (distance in feet).
- Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.

I (We) certify under penalty of perjury and under the laws of the State of Washington the foregoing is true, correct and complete to the best of my (our) knowledge. I (We) further certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been disclosed to the best of my (our) knowledge and are shown on the site plan submitted with this application. Applicant/Owner(s) assumes all risk and liability for any claims and liabilities.

Site Plan Drawing:

Appendix I Container Spacing

This Appendix is not a part of the requirements of this NFPA document, but is included for information purposes only.

NOTE 1: 5 ft minimum between relief valve discharge and external source of ignition (air conditioner), direct vent, or mechanical ventilation system (attic fan).

NOTE 2: If the DOT cylinder is filled on-site from a bulk truck, the filling connection and vent valve must be at least 10 ft from any external source of ignition, direct vent, or mechanical ventilation system.

(For SI Units: 1 ft = 0.3048 m)

Figure I-1 DOT Cylinders.
(This figure for illustrative purposes only; text shall govern.)

NOTE 1: Regardless of its size, any ASME tank filled on-site must be located so that the filling connection and fixed liquid level gauge are at least 10 ft from any external source of ignition (i.e. open flame, window A/C, compressor, etc). Intake to direct vented gas appliance or intake to a mechanical ventilation system.

(For SI Units: 1 ft = 0.3048 m)

Figure I-2 Aboveground ASME Containers

(This figure for illustrative purposes only; text shall govern.)

(For SI Units: 1 ft = 0.3048 m)
