

CRP 670: Chikamin Bridge Replacement Project

Chiwawa River Road at MP 9.43

Last Update: November 7, 2014

Project Vicinity Map

Project Typical Section

Project Number: County Road Project 670

Project Length: 60 feet

Basis for Project: Bridge Replacement

Construction: 2014

Project Description: This project will replace the structurally deficient NBIS Chikamin Creek Bridge on Chiwawa River Road, north of Plain, Washington. It is a vital link that serves residential, recreational, and agricultural traffic. The project is critical to the residents of Trinity and the USFS. Chikamin Creek Bridge #807 has a timber superstructure that is failing. The substructure is in fair condition and will also require replacement. The County proposes to remove the existing structure, install new bridge and pave approaches with HMA. The bridge is located in a remote area and is the sole access to sections of Chelan County north of the bridge.

Status: Construction is complete.

Traffic Impacts: None

Funding Sources:

Federal Highway Bridge Program	\$1,200,000
Chelan County	\$320,000

TOTAL: \$1,520,000
