1.0 GENERAL INFORMATION

1.1 INTRODUCTION

The Chelan County Public Works Department (CCPW) solicits interest from consulting firms (Proposer) who wish to be evaluated and considered for providing design support – specifically stormwater design and construction assistance for the county’s Squilchuck Road Improvement Project, County Road Project No. 748 (CRP748). The duration of the agreement is expected to be approximately two (2) years. This project is funded through State and Local Funds.

Consultants must demonstrate professional capability to perform the tasks assigned, and at a minimum, must have professional and business licenses required by the State of Washington and a demonstrable expertise in the disciplines necessary to accomplish the services.

The project must comply with all Federal EEO requirements, ADA, and Civil Rights regulations and requirements applicable to the County. Consultant services will be completed in accordance with Federal and State Law. No (0%) mandatory Disadvantaged Business Enterprises (DBE) goal has been assigned for this project.

1.2 PROJECT DESCRIPTION

This project will improve Squilchuck Road (10070), a Rural Minor Arterial that serves as the main access to the Wenatchee Heights and Mission Ridge areas. The beginning of the project will start at the Wenatchee city limits and the end of the project extends to just south of Methow Street.

The project’s primary purpose is to prevent further deterioration of the existing roadway and to maintain it at the least possible lifecycle cost. The County proposes to rebuild the roadway from subgrade and install new drainage structures that can be treated and conveyed through the project. In addition to using full-depth reclamation to recycle and rebuild the roadway, the project will widen the road to allow bicyclists a wider shared shoulder, improve drainage, and provide other safety improvements.

1.3 PROJECT SCOPE

This project scope consists of the following Work:

- 1) Analyzing the existing stormwater system and designing the stormwater system including treatment facilities as required;
- 2) Preparing/submitting/reviewing of roadway and stormwater concept(s) at 10% design including costs and risks associated with the concept(s);
- 3) Preparing and submitting a final Hydraulics Report by 90% design completion;
- 4) Compile plans, specifications, and estimate for stormwater systems for review at 60%, 90%, and final design signed by an Engineer;
- 5) Preparing construction feasibility information and a construction schedule; and

- 6) Supporting CCPW during the bidding process by addressing Bidder questions/comments.

Chelan County has existing survey topography, preliminary road corridor surface in Civil3D, preliminary stormwater layout, and existing stormwater facility as-builts.

The County desires the project to be complete up to 90% design by the end of 2026 in order to complete construction by the end of summer 2027. This completion date allows the County sufficient time to acquire Right of Way and/or sufficient time to process more complex environmental permits that may be triggered by the design.

Chelan County anticipates that construction will be completed by October 2027.
